LJA COVID Response Procedures, Practices and Protocols

1. Schoolwide Response Levels and Criteria for Transition Between Levels <u>LJA COVID-19 RISK RESPONSE LEVELS</u>

	Level 1 Low Risk	Level 1+ Increased Risk	Level 2 Heightened Risk	Level 3 High Risk
Situation	 Isolated outbreaks No cases at LJA New cases < 1/100k C&C Positivity < 3% ICU capacity < 70% 	 Low infection and rate of spread in community Confirmed case at LJA Gov't restrictions on gathering/group size No new cases at LJA for 14 days New cases < 10/100k C&C Positivity < 3% ICU capacity < 70% 	 Sustained community spread Multiple confirmed cases at LJA New cases < 15/100k C&C Positivity <10% ICU capacity 70-85% 	 Widespread community transmission Cluster of cases at LJA New cases > 15/100k C&C Positivity >10% ICU capacity > 85%
Face-to-Face Learning Environment	 LJA campuses open; parents and spectators permitted with mitigation measures Enhanced cleaning/safety practices Physical distancing wherever possible (3-6 feet) Masking may be required Field trips and Athletics may take place 	 LJA campuses open; Limited parents and spectators permitted Enhanced cleaning/safety practices Physical distancing wherever possible (3-6 feet) Masking required where physical distancing (3-6 feet) cannot be maintained Enhanced ventilation/ Outdoor learning and centers Field trips limited to on-island w/ safety precautions Avoid airports; discourage elective travel Extended Day, enrichment activities, vendors, and non-LJA participants are permitted Sports practice and games permitted, only if approved) 	 LJA campuses open; remote learning option available; parents and spectators not permitted Enhanced cleaning/safety practices Enhanced physical distancing Smaller group sizes enforced; preserve "ohana bubbles" Masking mandatory Enhanced ventilation/ Outdoor learning and centers No field trips No field trips No travel Extended Day permitted in grade level pods Enrichment activities permitted in grade level pods (Soccer Academy practice permitted with exception of non-LJA participants) Sports practice and games permitted with masking required (LLH sports permitted, only if approved) 	 Some or all divisions closed Childcare may be offered for qualifying first-responder and LJA employee families with enhanced physical distancing; mandatory mask wearing; small mixed age groups of students from the same families in pods of 9 students + 1 teacher.
Distance Learning Environment	No remote learners	 Students may engage remotely* Distance learning follows same curriculum as face-to-face 	 Students may engage remotely Distance learning follows same curriculum as face-to-face 	Distance Learning for affected class(es) or division(s) until Level 2 conditions restored

*Applicable for School Year 2020-21

Situational indicators can be found here:

<u>New cases per capita (7-day average)</u> Percent testing positive (7-day average)

Hospital ICU capacity

Criteria for School Re-Opening

Since the beginning of the COVID-19 pandemic, new information has emerged to guide safety in schools, and to conduct classes and activities safely in person, which is critical to students' well-being. LJA continues to be committed to provide a safe environment with a priority on face-to-face-learning.

During the 2020-2021 academic year, LJA used guidance from Johns Hopkins University, Harvard Global Health Institute, the US CDC, and other sources to guide re-opening. The school developed Response Levels with associated mitigation strategies; strategies that were updated throughout the school year to reflect periodic updates to federal and state guidelines, as well as from learning about what has worked within the school community.

These LJA Response levels consider:

- COVID-19 infection rate and test positivity on O'ahu and in the Windward Community as well as hospital capacity to handle a spike in cases.
- The ability to implement protocols within the school to reduce the risk of transmission as well as the commitment of families to abide by these protocols and safeguard the broader LJA ohana.

To minimize the risk of COVID-19 transmission in the face-to-face learning environment, the school employs a series of risk mitigation strategies. Home-based screening for symptoms consistent with COVID-19 is one of the most important strategies for keeping infection off-campus. On campus, mask wearing, physical distancing, hand washing/sanitizing, increased ventilation and outdoor learning spaces, and enhanced cleaning practices are all important strategies to mitigate spread. The school encourages faculty, staff, and students (when access becomes available), to get the COVID-19 vaccine. The school contact tracing team also responds quickly to any confirmed cases amongst the LJA 'ohana.

Process for Changing LJA Response Levels

- 1) The Medical Hui¹ will monitor the COVID-19 situation and the corresponding risk to, and implications for, the LJA community in order to determine the appropriate LJA Risk Response Level.
- 2) If the State, other agencies (e.g., CDC) or institutions (e.g., ILH/HHSAA) update their guidelines, that may precipitate changes in safety practices associated with a particular LJA Response Level. The Medical Hui will review any changes in guidelines and determine if changes are needed to school-practices within a given Risk Response Level.

¹ LJA Medical Hui consists of Dr. B. Anderson (Pediatrics), Dr. R. Bessinger (Epidemiology), Dr. S. Christensen (Family Practice), Dr. T. Crabtree (Chief Medical Officer, AMI), Dr. S. Hurley (Hospitalist, Straub Medical Center), Dr. J. Kim (Director General, International Vaccine Institute), Dr. S. Miscovich (President, Premier Medical Group), A. Thomas, NP (HPH)

LJA COVID Response Procedures, Practices and Protocols

2. Students/Family Members/Staff Health Guidelines

Home-Based Screening

Our first and most effective prevention strategy is for those who are sick, or who have been in close contact with someone with or exposed to COVID-19, to stay home and not come to school.

All members of the LJA community agree to self-check against the following symptoms. Keep in mind that while adults and children may experience similar symptoms of COVID-19, children's symptoms tend to be mild and more cold or flu like. According to the CDC, the following symptoms may appear 2-14 days after exposure to the virus:

- Fever (100.4 ° or higher)*
- Cough (persistent)*
- Shortness of breath or difficulty breathing*
- New loss of taste or smell
- Chills or Repeated shaking with chills
- Muscle aches/pain
- Severe Headache*
- Sore throat*
- Congestion or runny nose not related to seasonal allergies
- Nausea, vomiting or diarrhea*
- Fatigue

Based on CDC guidelines, children with any of the symptoms highlighted above (and noted with an asterix) may have an infectious illness and should not come to school.

Level 1	Level 1+	Level 2	Level 3
Low Risk	Increased Risk	Heightened Risk	High Risk
 Isolated outbreaks No cases at LJA New cases < 1/100k C&C Positivity < 3% ICU capacity < 70% 	 Low infection and rate of spread in community Confirmed case at LJA Gov't restrictions on gathering/group size No new cases at LJA for 14 days New cases < 10/100k C&C Positivity < 3% ICU capacity < 70% 	 Sustained community spread Multiple confirmed cases at LJA New cases < 15/100k C&C Positivity <10% ICU capacity 70-85% 	 Widespread community transmission Cluster of cases at LJA New cases > 15/100k C&C Positivity >10% ICU capacity > 85%

Section 2 - Students/Family Members/Staff Health Guidelines Page 1

Your kōkua, understanding and respect for the safety and comfort of all in our community is appreciated. As children are most likely to be infected by family members, it is important for everyone to think of family health, not just individual health. While children under 12 may be less efficient at spreading the virus, out of an abundance of caution, any child or staff living in a household with someone who has symptoms consistent with COVID-19, or is undergoing testing, should not come to school.

Positive COVID-19 Test Result If any child, staff, or member of one's household tests positive for COVID-19, the School should be notified **immediately** by emailing <u>school.nurse@lejardinacademy.org</u>. Moreover, if a household member tests positive, we request that household members get a COVID-19 Rapid PCR test, which provides results the same day. Our nurse can help you to locate a rapid-response testing facility.

Why the urgency? In mitigating spread, time is a critical factor, so immediate notification and rapid-response testing is vital. In addition, in reducing anxieties of our fellow school-community members who may have been close contacts of potential carriers, we strongly encourage all first-degree contacts to get tested with rare exception. School administrators will work in close collaboration with the Department of Health to determine courses of action (cf., <u>Section 5: In-School Illness Procedures and Protocols</u>).

Return-to-School after illness will also follow procedures and protocols noted in <u>Section 5</u>.

Maintaining Good Personal Hygiene An important strategy to reduce infection is to maintain good personal hygiene at home and throughout the school day. Frequent and thorough handwashing, without creating atypical anxieties, cannot be overemphasized.

Physical Distancing Physical distancing for LJA means preventing sustained close proximity, particularly in an enclosed environment (e.g., classroom without fresh air exchange). This standard is derived from contact tracing protocols employed by State agencies. In the absence of these conditions, students and staff should seek to maintain approximately 3-6 feet of distance from others.

Level 1	Level 1+	Level 2	Level 3
Low Risk	Increased Risk	Heightened Risk	High Risk
 Isolated outbreaks No cases at LJA New cases < 1/100k C&C Positivity < 3% ICU capacity < 70% 	 Low infection and rate of spread in community Confirmed case at LJA Gov't restrictions on gathering/group size No new cases at LJA for 14 days New cases < 10/100k C&C Positivity < 3% ICU capacity < 70% 	 Sustained community spread Multiple confirmed cases at LJA New cases < 15/100k C&C Positivity <10% ICU capacity 70-85% 	 Wdespread community transmission Cluster of cases at LJA New cases > 15/100k C&C Positivity >10% ICU capacity > 85%

Section 2 - Students/Family Members/Staff Health Guidelines Page 2

Group Size Group sizes will comply with CDC and State guidelines and are tied to the LJA Response Levels. Whenever possible, students will move in cohorts to limit spread of the virus and facilitate contact tracing, should it be required.

Masks Masks have been shown to be an important way to reduce the risk of transmission in conjunction with other mitigation strategies, are recommended by the CDC, and are now part of COVID-19 social norms. At Levels 1 and above, masks will be required in common areas and classrooms in deference to community norms and concerns. At Levels 2 and above, masks are required with specific exceptions in classrooms. Masks may be worn but are not required in outdoor activities (e.g., hiking, recess, PE and sports). Masks should be laundered or replaced daily to prevent bacterial or viral reproduction.

Travel Out-of-State School community members who must travel out-of-state are subject to State guidelines and orders. For our detailed policy, see <u>Section 8: Travel Policy</u>.

Respect for our Community We are grateful to be a part of a special school-community at LJA. Our community is not something we take for granted. It is not just a school, a set of buildings or assortment of playing fields and learning spaces; rather, we feel a deep obligation to each other and our surroundings regardless of race, creed, political suasion, gender...We are bound together by a common humanity and mission to make the world a better place--for all inhabitants of this planet.

While individual risk-preferences and beliefs around mitigation strategies vary--some being more risk-averse or some more skeptical of research reports and meta-analyses--community guidelines are designed to bring comfort to all LJA community members. It is in this spirit, a concern for the most vulnerable and anxious among us, that we kindly request your everyone's kōkua.

Kōkua is an often heard term but frequently misconstrued term. It does not merely mean "cooperation" or "help" as we often infer from TV or signage. Kōkua means something deeper. It means to extend oneself to others, in a sacrificial way, without the expectation of personal gain. It begins with understanding of and empathizing with others whose views may differ from our own, and it manifests

Level 1	Level 1+	Level 2	Level 3
Low Risk	Increased Risk	Heightened Risk	High Risk
 Isolated outbreaks No cases at LJA New cases < 1/100k C&C Positivity < 3% ICU capacity < 70% 	 Low infection and rate of spread in community Confirmed case at LJA Gov't restrictions on gathering/group size No new cases at LJA for 14 days New cases < 10/100k C&C Positivity < 3% ICU capacity < 70% 	 Sustained community spread Multiple confirmed cases at LJA New cases < 15/100k C&C Positivity <10% ICU capacity 70-85% 	 Widespread community transmission Cluster of cases at LJA New cases > 15/100k C&C Positivity >10% ICU capacity > 85%

Section 2 - Students/Family Members/Staff Health Guidelines Page 3

itself as sincere effort to subordinate self to community. It is in this sense, and with gratitude, that the LJA community seeks every member's kokua.

Level 1	Level 1+	Level 2	Level 3
Low Risk	Increased Risk	Heightened Risk	High Risk
 Isolated outbreaks No cases at LJA New cases < 1/100k C&C Positivity < 3% ICU capacity < 70% 	 Low infection and rate of spread in community Confirmed case at LJA Gov't restrictions on gathering/group size No new cases at LJA for 14 days New cases < 10/100k C&C Positivity < 3% ICU capacity < 70% 	 Sustained community spread Multiple confirmed cases at LJA New cases < 15/100k C&C Positivity <10% ICU capacity 70-85% 	 Widespread community transmission Cluster of cases at LJA New cases > 15/100k C&C Positivity >10% ICU capacity > 85%

Section 2 - Students/Family Members/Staff Health Guidelines Page 4

LJA COVID Response Procedures, Practices and Protocols

3. Drop-off and Pick-up Procedures and Protocols

Screening Procedure Prior To/Upon Arrival

Prior to drop-off each morning, all parents must complete a health screening through the SchoolPass app which will be verified at drop-off. Parents who send their children via carpool must complete this screening prior to carpool pick-up. High school students are permitted to complete the health screen on their own. An LJA staff member will greet your child at designated drop off locations. Please wait inside your vehicle. Children will not be allowed to attend if they:

- Have a fever of 100.4° F or higher and/or have cold or flu symptoms that include: cough¹, sore throat, difficulty breathing², diarrhea or vomiting, or or new onset of severe headache
- Have been in contact with someone under investigation for or with a confirmed case of COVID-19 (See HDOH guidelines for exposure).

General Drop-off and Pick-up Procedures

- Please drop-off and pick-up only at your designated location and remain inside your vehicle. For Lower School and Extended Day, place your student name placard on the dashboard of your car so that it can be seen through the front windshield. An LJA Staff member will greet your child and/or bring your child out to you. We ask for your kokua in limiting direct contact between parents and staff members and adhering to physical distancing recommendations.
- Students with siblings will be asked to drop-off and pick-up at the location designated for the youngest sibling.

Late Drop-off/Early Pick-up

² For students with asthma, a change in baseline breathing

Level 1	Level 1+	Level 2	Level 3
Low Risk	Increased Risk	Heightened Risk	High Risk
 Isolated outbreaks No cases at LJA New cases < 1/100k C&C Positivity < 3% ICU capacity < 70% 	 Low infection and rate of spread in community Confirmed case at LJA Gov't restrictions on gathering/group size No new cases at LJA for 14 days New cases < 10/100k C&C Positivity < 3% ICU capacity < 70% 	 Sustained community spread Multiple confirmed cases at LJA New cases < 15/100k C&C Positivity <10% ICU capacity 70-85% 	 Widespread community transmission Cluster of cases at LJA New cases > 15/100k C&C Positivity >10% ICU capacity > 85%

Section 3 - Drop-off and Pick-up Procedures and Protocols Page 1

¹ For students with chronic cough due to allergies or asthma, change from usual cough

If a student(s) needs to be dropped off to school later or needs to be picked up from school earlier please contact the appropriate office to make arrangements. Student(s) being dropped off late will need to complete the daily health screening.

HIgh School Drop-off and Pick-up Specifics

Main Campus Drop-off and Pick-up Schedule

- High School students should be dropped off and picked up at the designated drop-off area for the HS and not in the HS driveway loop beside the basketball court in order to assist with traffic flow.
- Drivers should drop-off/pick up students as far forward and as close as possible to the designated HS drop-off location (i.e. please do not stop along the student locker areas to let students out closer to their classrooms/lockers, as this causes congestion and an unsafe situation when drivers attempt to drive around into oncoming vehicle and pedestrian traffic).
- Drivers are also asked not to drive through the gravel student parking lot during the drop-off or pick up process. This creates a very unsafe situation for our student drivers parking and leaving their assigned stalls.

Early Morning Care begins at 6:30 a.m. and students will be gathered by small grade-level groups when possible at different locations on campus.					
Drop-off	7:30 a.m 7:40 a.m. K, 1, 2, 3, 4, 5 Lower School Loop				
	7:40 a.m 7:55 a.m.	6, 7, 8	Middle School Lane		
	7:45 a.m 8:00 a.m.	9, 10, 11, 12	High School Lane		
Pick-up	2:35 p.m.	К, 1	Lower School Loop		
	2:45 p.m.	2, 3	Lower School Loop		
	2:55 p.m.	4, 5	Lower School Loop		

Level 1	Level 1+	Level 2	Level 3
Low Risk	Increased Risk	Heightened Risk	High Risk
 Isolated outbreaks No cases at LJA New cases < 1/100k C&C Positivity < 3% ICU capacity < 70% 	 Low infection and rate of spread in community Confirmed case at LJA Gov't restrictions on gathering/group size No new cases at LJA for 14 days New cases < 10/100k C&C Positivity < 3% ICU capacity < 70% 	 Sustained community spread Multiple confirmed cases at LJA New cases < 15/100k C&C Positivity <10% ICU capacity 70-85% 	 Widespread community transmission Cluster of cases at LJA New cases > 15/100k C&C Positivity >10% ICU capacity > 85%

Section 3 - Drop-off and Pick-up Procedures and Protocols Page 2

May 2021				
	3:15 p.m. (Wednesdays 2:30 p.m.)	6, 7, 8	Middle School Lane	
	3:25 p.m. (Wednesdays 2:25 p.m.)	9, 10, 11, 12	High School Lane	

Junior School Campus Drop-off and Pick-up Schedule					
Early Morning Care begins at 6:30 a.m.					
Drop-off	Drop-off 6:30 - 7:25 a.m. PK, JK Rooms 3 & 4				
Drop-off	7:30-8:00 a.m.	РК, ЈК	Front Courtyard		
Pick-up 11:20 a.m. PK half-day Front Courtyard					
	2:20 p.m.	PK full-day, JK	Front Courtyard		

Extended Day Pick-up

K-8 Students registered for Extended Day will pick-up in the Lower School Loop

PK and JK Students registered for Extended Day will pick-up in the Front Courtyard at the Junior School Campus.

Athletics Drop-off and Pick-up Procedure

Screening Procedure Before Arrival

• Coaches will communicate the importance of staying home when sick along with arrival procedures to parents and athletes

Level 1	Level 1+	Level 2	Level 3
Low Risk	Increased Risk	Heightened Risk	High Risk
 Isolated outbreaks No cases at LJA New cases < 1/100k C&C Positivity < 3% ICU capacity < 70% 	 Low infection and rate of spread in community Confirmed case at LJA Gov't restrictions on gathering/group size No new cases at LJA for 14 days New cases < 10/100k C&C Positivity < 3% ICU capacity < 70% 	 Sustained community spread Multiple confirmed cases at LJA New cases < 15/100k C&C Positivity <10% ICU capacity 70-85% 	 Widespread community transmission Cluster of cases at LJA New cases > 15/100k C&C Positivity >10% ICU capacity > 85%

Section 3 - Drop-off and Pick-up Procedures and Protocols Page 3

- Athletes and coaches--including visiting teams--must complete SchoolPass App pre-screening form. Persons who have a temperature of 100.4° F or above, shortness of breath, cough or loss of taste/smell may not participate in activities on campus
- LJA staff will verify SchoolPass badges for participants and audit temperatures, practices and procedures
- Coaches will conduct a visual inspection of athletes for signs of illness

Pick-up Procedures

Parents should wait in their cars at the gym (or designated pick-up area) and staff will release students to them after practices or games.

Level 1	Level 1+	Level 2	Level 3
Low Risk	Increased Risk	Heightened Risk	High Risk
 Isolated outbreaks No cases at LJA New cases < 1/100k C&C Positivity < 3% ICU capacity < 70% 	 Low infection and rate of spread in community Confirmed case at LJA Gov't restrictions on gathering/group size No new cases at LJA for 14 days New cases < 10/100k C&C Positivity < 3% ICU capacity < 70% 	 Sustained community spread Multiple confirmed cases at LJA New cases < 15/100k C&C Positivity <10% ICU capacity 70-85% 	 Widespread community transmission Cluster of cases at LJA New cases > 15/100k C&C Positivity >10% ICU capacity > 85%

Section 3 - Drop-off and Pick-up Procedures and Protocols Page 4

LJA COVID Response Procedures, Practices and Protocols

4. Physical Distancing and Masking Practices and Protocols

Risk Response Level 1 and 1+

In the interest of clarity around masking, the following is illustrative of masking at different levels of response. This is not intended to be exhaustive; rather, teachers are encouraged to use their discretion in the infinite number of classroom activities and situations that arise. When in doubt error on the side of caution.

Illustrative Masking Scenarios - Level 1 and 1+

Level 1 and 1+	РК-2	3-5	6-8	9-12
Grouping Assumption	Cohort-based	Cohort-based	Interaction between of bubble generally by g	,
Collaborative Work	 With masks, may work without distancing but with ventilation or use of outdoor spaces Wash hands prior to and following activity Work outdoors when possible 			
Whole Class Instruction	 Masks are generally required with seats spaced 3'-6' or with individuals separated by sneeze shields Use cross ventilation, mechanical fan or outdoor spaces Use "staggered" seating formation to optimize space Masks are not necessary but encouraged along with distancing outdoors 			

Level 1	Level 1+	Level 2	Level 3
Low Risk	Increased Risk	Heightened Risk	High Risk
 Isolated outbreaks No cases at LJA New cases < 1/100k C&C Positivity < 3% ICU capacity < 70% 	 Low infection and rate of spread in community Confirmed case at LJA Gov't restrictions on gathering/group size No new cases at LJA for 14 days New cases < 10/100k C&C Positivity < 3% ICU capacity < 70% 	 Sustained community spread Multiple confirmed cases at LJA New cases < 15/100k C&C Positivity <10% ICU capacity 70-85% 	 Widespread community transmission Cluster of cases at LJA New cases > 15/100k C&C Positivity >10% ICU capacity > 85%

Section 4 - Physical Distancing and Masking Practices and Protocols Page 1

Risk Response Level 2

If the LJA COVID-19 Risk Response Level increases to Level 2, mask wearing becomes mandatory at all grade levels (except PK-2). Enhanced physical distancing is increased to 6 feet.

Masks

Masks are an important barrier to reduce the spread of respiratory droplets and also may help protect the wearer from inhaling infected droplets. Masks, in combination with physical distancing, hand-washing, disinfecting hi-touch surfaces, and absenting-when-ill practices, can substantially mitigate spread. In February 2021, the CDC found that double-masking is more effective than single masking; however, it stopped short of recommending double-masking.

Students and staff should have at least two clean cloth masks at school each day. Masks should completely cover the nose and mouth and fit snugly against the face without gaps. Cloth masks should have at least two layers of fabric. Individuals requiring a medical exemption to these guidelines should provide a doctor's note to the school.

Face shields are not a suitable alternative to cloth masks for staff or students. Maximum protection can be achieved by wearing both a cloth mask and a face shield and is encouraged for those staff at higher risk of COVID-19 complications and for those who live with vulnerable family members.

Masks will generally be worn in the classroom (except PK-2) and in common areas.

Masks are not required when a staff member or student is isolated in a classroom/office or engaged in an outdoor activity. It is recommended that masks be changed after lunch and washed daily with soap and water.

Level 1	Level 1+	Level 2	Level 3
Low Risk	Increased Risk	Heightened Risk	High Risk
 Isolated outbreaks No cases at LJA New cases < 1/100k C&C Positivity < 3% ICU capacity < 70% 	 Low infection and rate of spread in community Confirmed case at LJA Gov't restrictions on gathering/group size No new cases at LJA for 14 days New cases < 10/100k C&C Positivity < 3% ICU capacity < 70% 	 Sustained community spread Multiple confirmed cases at LJA New cases < 15/100k C&C Positivity <10% ICU capacity 70-85% 	 Widespread community transmission Cluster of cases at LJA New cases > 15/100k C&C Positivity >10% ICU capacity > 85%

Section 4 - Physical Distancing and Masking Practices and Protocols Page 2

Level 2	РК-2	3-5	6-8	9-12	
Fire Drills	Mask				
Common Areas	Mask				
Collaborative Work	Mask* Mask				
Whole Class Instruction	Mask* Mask unless physically distanced, separated by sneeze shields, in an area with cross ventilation, or outside				
Teacher/Aide in Classroom	Mask*	Masks where physical distancing cannot be maintained			
Outdoor Activities	No mask where physical distancing can be maintained				
Isolation	No mask				

N.B., Students and staff may be asked to wear masks at other times or on occasions as appropriate. *If masking results in fidgeting with masks or continual correction by peers or teachers, the school leadership team will reconsider the practice with input from Medical Hui and parent engagement.

Lunch & Recess

Students will eat in the classrooms, outside or in the Wang with physical distancing. Group sizes as recommended by most recent CDC, DHS and DOH guidelines will be adhered to at recess. No high-touch sports will be played at recess.

Restroom Practice

Level 1	Level 1+	Level 2	Level 3
Low Risk	Increased Risk	Heightened Risk	High Risk
 Isolated outbreaks No cases at LJA New cases < 1/100k C&C Positivity < 3% ICU capacity < 70% 	 Low infection and rate of spread in community Confirmed case at LJA Gov't restrictions on gathering/group size No new cases at LJA for 14 days New cases < 10/100k C&C Positivity < 3% ICU capacity < 70% 	 Sustained community spread Multiple confirmed cases at LJA New cases < 15/100k C&C Positivity <10% ICU capacity 70-85% 	 Widespread community transmission Cluster of cases at LJA New cases > 15/100k C&C Positivity >10% ICU capacity > 85%

Section 4 - Physical Distancing and Masking Practices and Protocols Page 3

Students will need to wear a mask when going to use the restroom. Only one student will be allowed per single-stall bathroom and 3'-6' physical distancing should be maintained per multi-stalled bathroom, locker room, or changing area at one time.

Level 1	Level 1+	Level 2	Level 3
Low Risk	Increased Risk	Heightened Risk	High Risk
 Isolated outbreaks No cases at LJA New cases < 1/100k C&C Positivity < 3% ICU capacity < 70% 	 Low infection and rate of spread in community Confirmed case at LJA Gov't restrictions on gathering/group size No new cases at LJA for 14 days New cases < 10/100k C&C Positivity < 3% ICU capacity < 70% 	 Sustained community spread Multiple confirmed cases at LJA New cases < 15/100k C&C Positivity <10% ICU capacity 70-85% 	 Widespread community transmission Cluster of cases at LJA New cases > 15/100k C&C Positivity >10% ICU capacity > 85%

Section 4 - Physical Distancing and Masking Practices and Protocols Page 4

LJA COVID Response Procedures, Practices and Protocols

5. In-School Illness Procedures and Protocols

Student

If a child becomes sick while at school, the student will be sent to the Office. He/she must wait outside until the Nurse/Assistant takes the student's temperature. If the student is fever-free, then he/she can enter the Office.

If the student has symptoms consistent with COVID-19, the student will be placed in the designated isolation area. The Nurse will notify the Receptionist/Admin Assistant who will contact the parent to pick up the student. The student will not enter any interior spaces when being escorted to his/her parent's car. Parents will be advised to contact their primary care provider for evaluation within 24 hours, and if indicated, a COVID-19 test with a rapid-turnaround time. The Nurse may also assist in contacting a testing facility able to provide a rapid-test result. The student may not return to school until medically cleared.

For students with other symptoms, the student will be evaluated by the nurse. Staff will be more conservative than usual in identifying signs and symptoms and taking action. For any student with symptoms indicative of COVID-19, the student will be isolated, and the parents will be contacted as above. Testing in these cases is discretionary, but the student should check with the Nurse upon return to ensure that the student has been symptom-free without medication for 24 hours.

Staff will wear appropriate PPE, clean and disinfect surfaces and materials that the child may have touched after leaving the facility.

Staff

If a staff member should fall ill, the staff member will go to the Nurse's Office. If it is determined that the staff member should go home, a substitute will be called in to take his/her place. Custodial staff or Nurse will clean and disinfect surfaces and materials that the ill staff member may have used, if warranted.

Level 1	Level 1+	Level 2	Level 3
Low Risk	Increased Risk	Heightened Risk	High Risk
 Isolated outbreaks No cases at LJA New cases < 1/100k C&C Positivity < 3% ICU capacity < 70% 	 Low infection and rate of spread in community Confirmed case at LJA Gov't restrictions on gathering/group size No new cases at LJA for 14 days New cases < 10/100k C&C Positivity < 3% ICU capacity < 70% 	 Sustained community spread Multiple confirmed cases at LJA New cases < 15/100k C&C Positivity <10% ICU capacity 70-85% 	 Widespread community transmission Cluster of cases at LJA New cases > 15/100k C&C Positivity >10% ICU capacity > 85%

Section 5 - In-school Illness Procedures and Protocols Page 1

LE JARDIN ACADEMY

May 2021

Staff members who stay home due to fever, cough, shortness of breath, loss of taste/ smell should be cleared by their doctor before returning to work. Headache alone, especially with a history of migraine, may be able to return when symptoms subside. The same applies in cases of nausea, vomiting, and diarrhea, if not accompanied by fever. Staff should be able to return after 24 hours without symptoms, if not sooner.

COVID-19 Confirmed Case and First-Degree Contact Procedure

If a student or staff member is diagnosed with COVID-19:

- 1. He/she must notify the nurse at <u>school.nurse@lejardinacademy.org</u> and begin **immediate home isolation**.
- 2. The medical practitioner is required to notify the DOH; however, School Nurse will provide information to DOH Contact Tracing department per DOH Guidelines.
- 3. The facilities, including lockers, desks and cubbies, that he/she used will be disinfected
- 4. Students and staff who had close contact (i.e., first-degree contacts) with an infected individual would be notified to quarantine for 10 days, symptom-free, from last interaction with COVID-contact or 7 days after last exposure with negative COVID result. An HDOH physician's Release from Isolation letter is required on return. CDC defines first-degree contact as an individual who was within 6 feet of an infected person for at least 15 minutes starting from two days before onset of symptoms. HDOH defines close contact as all students in a standard classroom for a prolonged period. Tracing will reach back to 2 days prior to symptom onset.
- 5. Should a large number of individuals require testing, the school may offer "pop-up" rapid testing on-site to speed identification and improve likelihood of containment
- 6. For those who have been fully vaccinated (two doses of Pfizer or Moderna vaccine or one dose of Johnson & Johnson, plus two-weeks since the last dose), first degree contacts are not required to quarantine. Students and staff who are first-degree contacts may return to campus as long as they are asymptomatic and self-screen for symptoms over the next 10 days. If they develop symptoms consistent with COVID, they must immediately quarantine and undergo COVID testing.

Level 1	Level 1+	Level 2	Level 3
Low Risk	Increased Risk	Heightened Risk	High Risk
 Isolated outbreaks No cases at LJA New cases < 1/100k C&C Positivity < 3% ICU capacity < 70% 	 Low infection and rate of spread in community Confirmed case at LJA Gov't restrictions on gathering/group size No new cases at LJA for 14 days New cases < 10/100k C&C Positivity < 3% ICU capacity < 70% 	 Sustained community spread Multiple confirmed cases at LJA New cases < 15/100k C&C Positivity <10% ICU capacity 70-85% 	 Widespread community transmission Cluster of cases at LJA New cases > 15/100k C&C Positivity >10% ICU capacity > 85%

Section 5 - In-school Illness Procedures and Protocols Page 2

- 7. **Second-degree contacts**, that is, contacts of those first-degree contacts need neither be quarantined nor notified unless a first-degree contact tests positive
- 8. Although the DOH is responsible for contact tracing, LJA will implement this internal procedure immediately on notification of positive test result (or prior to result, if positive outcome is likely) and will share information with DOH contact tracers when they contact with the school

Return to School

After being diagnosed with COVID-19, a staff or student may <u>return to school after the following criteria</u> are met:

- 24 hours with no fever; and,
- respiratory and other symptoms have improved (e.g., cough, shortness of breath); and,
- 10 days since symptoms first appeared

Prior to return, individuals should provide a doctor's note (Request a HDOH Release from Isolation letter from your physician) to the nurse at school.nurse@lejardinacademy.org.

COVID-19 Response Team

The COVID Response Team consists of:

- 1. Head of School/designee facilitate and coordinate response
- 2. Manager for Business & Finance notify insurer
- 3. Director of Facilities begin facility shutdown and disinfection procedure
- 4. School Nurse (COVID) notify DOH; assemble contact tracers and begin tracing, isolation and notification procedure
- 5. Associate Director of Communications and Director of Advancement tailor and send constituent messaging
- 6. Manager of Human Resources prepare for staff notices of support (e.g., EAP, health benefits, FFCRA, FMLA...)
- 7. Principal/Supervisor of the affected division(s) facilitate identification of first-degree contacts and facilities for disinfection; follow-up with student
- 8. Director of Educational Technology update ENS contact list

Level 1	Level 1+	Level 2	Level 3
Low Risk	Increased Risk	Heightened Risk	High Risk
 Isolated outbreaks No cases at LJA New cases < 1/100k C&C Positivity < 3% ICU capacity < 70% 	 Low infection and rate of spread in community Confirmed case at LJA Gov't restrictions on gathering/group size No new cases at LJA for 14 days New cases < 10/100k C&C Positivity < 3% ICU capacity < 70% 	 Sustained community spread Multiple confirmed cases at LJA New cases < 15/100k C&C Positivity <10% ICU capacity 70-85% 	 Widespread community transmission Cluster of cases at LJA New cases > 15/100k C&C Positivity >10% ICU capacity > 85%

Section 5 - In-school Illness Procedures and Protocols Page 3

In the event of a COVID-positive event, the Nurse will have the Assistant to the Head of School initiate an immediate Zoom/F2F meeting for the COVID Response Team. The Nurse will brief the team on the case per <u>CDC protocol</u>, and each member will dispatch respective responsibilities. Updates will be shared via GroupMe, and the Response Team will convene prior to the end of the day or just after All LJA notification is set for distribution. It is expected that a message will be sent by the end of the day. The Nurse will send the HDOH Close Contact Report Form to the HDOH.

Level 1	Level 1+	Level 2	Level 3

 Isolated outbreaks No cases at LJA New cases < 1/100k C&C Positivity < 3% ICU capacity < 70% 	 Low infection and rate of spread in community Confirmed case at LJA Gov't restrictions on gathering/group size No new cases at LJA for 14 days New cases < 10/100k C&C Positivity < 3% ICU capacity < 70% 	 Sustained community spread Multiple confirmed cases at LJA New cases < 15/100k C&C Positivity <10% ICU capacity 70-85% 	 Widespread community transmission Cluster of cases at LJA New cases > 15/100k C&C Positivity >10% ICU capacity > 85%

Section 5 - In-school Illness Procedures and Protocols Page 4

LJA COVID Response Procedures, Practices and Protocols

6. Personal Hygiene Practices

Handwashing

Students and staff will wash their hands upon arrival at school, before and after meals or snacks, after using the restroom, and before leaving school to go home. Hands should be washed with soap and water for at least 20 seconds each time.

Use of Hand Sanitizer

We will use hand sanitizer in-between hand-washing during our daily routine. When students come in from outside time during the school day, staff will give them hand sanitizer with at least 60% alcohol. This will not replace hand-washing; rather, it is intended to protect the school environment until the child proceeds to a hand-washing station. Our primary means of hygiene will be frequent and effective hand-washing with soap and water.

Masks

Masks should be laundered or replaced daily, if possible, to prevent bacterial or viral reproduction.

Level 1	Level 1+	Level 2	Level 3
Low Risk	Increased Risk	Heightened Risk	High Risk
 Isolated outbreaks No cases at LJA New cases < 1/100k C&C Positivity < 3% ICU capacity < 70% 	 Low infection and rate of spread in community Confirmed case at LJA Gov't restrictions on gathering/group size No new cases at LJA for 14 days New cases < 10/100k C&C Positivity < 3% ICU capacity < 70% 	 Sustained community spread Multiple confirmed cases at LJA New cases < 15/100k C&C Positivity <10% ICU capacity 70-85% 	 Wdespread community transmission Cluster of cases at LJA New cases > 15/100k C&C Positivity >10% ICU capacity > 85%

Section 6 - Personal Hygiene Practices Page 1

LJA COVID Response Procedures, Practices and Protocols

7. Cleaning and Disinfecting Practices

Classrooms and Lavatories

Daily cleaning of the surfaces in our classrooms and common spaces will be carried out by professional cleaning services contractors based on CDC guidelines. High-touch areas will be disinfected at least once a day using a disinfectant solution approved by the Environmental Protection Agency for COVID-19. More frequent cleaning and disinfection will occur in PK-2 classrooms where students may not always be consistently wearing masks, wash hands, or cover sneezes and coughs.

High touch areas for disinfection include:

- Door levers
- Light switches
- Sink faucet levers
- Restroom sinks, faucets and toilet flush handles
- Student desks and chairs

If someone is sick or has tested positive for COVID-19 and has been on campus within the last 24 hours, the school facility will be cleaned and disinfected.

Athletic Facilities and Vans

Pool

- Infection prevention materials will be available in the lifeguard room (i.e., hand sanitizer, Clorox wipes, gloves etc.)
- Bathrooms will be disinfected every night after practice by coaches and twice daily by staff
- No sharing of goggles, hair caps or other personal equipment

Gym

Level 1	Level 1+	Level 2	Level 3
Low Risk	Increased Risk	Heightened Risk	High Risk
 Isolated outbreaks No cases at LJA New cases < 1/100k C&C Positivity < 3% ICU capacity < 70% 	 Low infection and rate of spread in community Confirmed case at LJA Gov't restrictions on gathering/group size No new cases at LJA for 14 days New cases < 10/100k C&C Positivity < 3% ICU capacity < 70% 	 Sustained community spread Multiple confirmed cases at LJA New cases < 15/100k C&C Positivity <10% ICU capacity 70-85% 	 Widespread community transmission Cluster of cases at LJA New cases > 15/100k C&C Positivity >10% ICU capacity > 85%

Section 7 - Cleaning and Disinfecting Practices Page 1

- Infection prevention materials will be available in the corner of the gym by the Athletic Training Room (i.e., hand sanitizer, Clorox wipes, gloves etc.)
- Locker rooms will be disinfected after every use by coaches and twice a day by staff
- Physical contact and activities should follow Athletic Response Levels
- No sharing personal equipment. Each individual uses the same ball for all training activities. If the ball must be shared, it must be cleaned after use.

Soccer Field

- Infection prevention materials will be available in Callum's office (i.e., hand sanitizer, Clorox wipes, etc.)
- Physical contact and activities should follow Athletic Response Levels
- No sharing of personal equipment (e.g., gloves, shin guards, water bottles, etc.)

Weight Room

- Infection prevention materials will be available at the entrance of the weight room (i.e., hand sanitizer, Clorox wipes, etc.)
- Users must disinfectant and wipe down equipment after each use
- Strength and Conditioning coach will disinfect the floors every evening Monday-Saturday

Van Use

- Routine washing and enhanced cleaning must be performed after each use.
- Spray disinfectant after each use and let solution air dry for upholstery
 - Facilities will provide spray bottles with disinfectant solution and clean microfiber rags in each vehicle with "dirty rag" receptacles at specific locations on the campus to drop off after each use.
 - Spray microfiber cloth and wipe down all controls (i.e., steering, ignition, radio and air conditioning controls, windshield wiper lever, turn signal levers, etc.), keys, seat belt buckles and tongues, door handles (interior and exterior), recliner and seat tilt levers.
 - Facilities will launder microfiber cloths at highest temperature settings for reuse and redistribute to vehicles.

Level 1	Level 1+	Level 2	Level 3
Low Risk	Increased Risk	Heightened Risk	High Risk
 Isolated outbreaks No cases at LJA New cases < 1/100k C&C Positivity < 3% ICU capacity < 70% 	 Low infection and rate of spread in community Confirmed case at LJA Gov't restrictions on gathering/group size No new cases at LJA for 14 days New cases < 10/100k C&C Positivity < 3% ICU capacity < 70% 	 Sustained community spread Multiple confirmed cases at LJA New cases < 15/100k C&C Positivity <10% ICU capacity 70-85% 	 Wdespread community transmission Cluster of cases at LJA New cases > 15/100k C&C Positivity >10% ICU capacity > 85%

Section 7 - Cleaning and Disinfecting Practices Page 2

LJA COVID Response Procedures, Practices and Protocols

8. Travel Policy

School community members who must travel out-of-state are subject to State guidelines and orders. According to State of Hawai'i travel requirements, all out-of-state travelers are subject to a 10-day home quarantine unless either granted an exemption through the State Office of COVID Exemption or cleared through a State-approved pre-travel COVID test.

In addition, any teacher who travels out of the State will be required to have a negative COVID-19 test on return to O'ahu, unless fully vaccinated, and clearance from the Nurse before he/she is provisionally allowed on campus with strict masking and physical distancing requirements. Unless fully vaccinated, a second negative test within 5-7 days is required to be considered unconditionally returned to work. Test results should be provided to the nurse at <u>school.nurse@lejardinacademy.org</u>.

Effective May 2021, and as long as the State allows a pre-travel COVID test for out-of-state unvaccinated travelers, students may return to campus provided:

- 1. Student registers planned travel through designated division principal/designee and notify school nurse
- 2. Student takes an approved, pre-travel PCR test and registers through the State's <u>Safe Travels</u> <u>App</u>
- 3. With a negative, pre-travel PCR test and a second, negative, on-island PCR or school nurse approved antigen test 5-7 days following return to O'ahu, student will be permitted to return to campus without condition. Until these results are known, however, the student should remain at home. Advantage: shortens the amount of time that students are out of school relative to the alternative, the 10-day quarantine.
- 4. If a student has a positive antigen test, then he/she would follow-up with a PCR test to verify the result, and, if positive, would follow COVID illness procedure.
- 5. Fully vaccinated students are not required to take a COVID test on-island after returning from travel. They may return to campus on return to O'ahu.

Level 1	Level 1+	Level 2	Level 3
Low Risk	Increased Risk	Heightened Risk	High Risk
 Isolated outbreaks No cases at LJA New cases < 1/100k C&C Positivity < 3% ICU capacity < 70% 	 Low infection and rate of spread in community Confirmed case at LJA Gov't restrictions on gathering/group size No new cases at LJA for 14 days New cases < 10/100k C&C Positivity < 3% ICU capacity < 70% 	 Sustained community spread Multiple confirmed cases at LJA New cases < 15/100k C&C Positivity <10% ICU capacity 70-85% 	 Wdespread community transmission Cluster of cases at LJA New cases > 15/100k C&C Positivity >10% ICU capacity > 85%

Notwithstanding the pre-travel testing option, LJA recommends that staff use the existing return-from-travel protocol which has the advantage of preventing absence from school:

- 1. Notify supervisor and school nurse of planned travel.
- 2. Enter information into State Safe Travel app
- 3. On return to O'ahu, take a PCR test* unless fully vaccinated in which case teacher may return without condition (steps 4-7, then do not apply)
- 4. Upload test result to the State's Safe Travel App and provide to school nurse
- 5. Conditionally return to campus following negative test subject to strict distancing and masking requirements
- 6. 5-7 days following first test, take a second PCR test*
- 7. Unconditionally return to campus following second negative PCR test*

*a school nurse approved antigen-based test may be substituted for a PCR test

Level 1	Level 1+	Level 2	Level 3
Low Risk	Increased Risk	Heightened Risk	High Risk
 Isolated outbreaks No cases at LJA New cases < 1/100k C&C Positivity < 3% ICU capacity < 70% 	 Low infection and rate of spread in community Confirmed case at LJA Gov't restrictions on gathering/group size No new cases at LJA for 14 days New cases < 10/100k C&C Positivity < 3% ICU capacity < 70% 	 Sustained community spread Multiple confirmed cases at LJA New cases < 15/100k C&C Positivity <10% ICU capacity 70-85% 	 Widespread community transmission Cluster of cases at LJA New cases > 15/100k C&C Positivity >10% ICU capacity > 85%

LJA COVID Response Procedures, Practices and Protocols

9. Visitor Policy

We know parent support is a critical component of our school community. However, visitors to campus will be limited to ensure the safety and well-being of our students and staff. Regular volunteers and invited speakers will be permitted on campus and will be required to follow visitor protocols. This includes a check-in at the appropriate office (i.e. Junior School Office, Main/Administration Office or High School Office) to complete a health screening form, sanitizing hands upon entry, wearing a mask and complying with physical distancing norms. If the school Response Level increases to Level 2, visitors will be further limited. Substitute teachers are to follow the visitor policy.

At Level 1+, the school will seek to invite families to campus for significant events in the lives of our children. These events may include: graduation, May Day, play production and concerts at which crowds can be managed, and the like. Spectators at athletic events are governed by the ILH and HHSAA.

Level 1	Level 1+	Level 2	Level 3
Low Risk	Increased Risk	Heightened Risk	High Risk
 Isolated outbreaks No cases at LJA New cases < 1/100k C&C Positivity < 3% ICU capacity < 70% 	 Low infection and rate of spread in community Confirmed case at LJA Gov't restrictions on gathering/group size No new cases at LJA for 14 days New cases < 10/100k C&C Positivity < 3% ICU capacity < 70% 	 Sustained community spread Multiple confirmed cases at LJA New cases < 15/100k C&C Positivity <10% ICU capacity 70-85% 	 Widespread community transmission Cluster of cases at LJA New cases > 15/100k C&C Positivity >10% ICU capacity > 85%

LJA COVID Response Procedures, Practices and Protocols

10. Enhanced Ventilation & Outdoor Learning

Many classrooms are taking place under tents outdoors where risk of transmission is very low. Where possible, doors and windows of classrooms are left open to increase air circulation. Fans are used in some classrooms to increase air circulation, draw outdoor air into the room, and to support air flow away from students and to the outdoors. HVAC and HEPA filters may have been upgraded and changed per manufacturer guidelines.

For more information regarding the CDC recommendations for ventilation in schools. Please use this link: <u>https://www.cdc.gov/coronavirus/2019-ncov/community/schools-childcare/ventilation.html</u>

Level 1	Level 1+	Level 2	Level 3
Low Risk	Increased Risk	Heightened Risk	High Risk
 Isolated outbreaks No cases at LJA New cases < 1/100k C&C Positivity < 3% ICU capacity < 70% 	 Low infection and rate of spread in community Confirmed case at LJA Gov't restrictions on gathering/group size No new cases at LJA for 14 days New cases < 10/100k C&C Positivity < 3% ICU capacity < 70% 	 Sustained community spread Multiple confirmed cases at LJA New cases < 15/100k C&C Positivity <10% ICU capacity 70-85% 	 Widespread community transmission Cluster of cases at LJA New cases > 15/100k C&C Positivity >10% ICU capacity > 85%

LJA COVID Response Procedures, Practices and Protocols

11. Athletics Return to Training Protocols

This applies to all athletes, coaches, alumni, staff and vendors using any LJA athletic facility. These guidelines are intended to protect the safety of our community by preventing and mitigating spread of the virus.

General Rules:

- No spectators allowed at this time
- Limit non-essential visitors to the school-only LJA athletes/teams/vendors using our facilities
- No sharing of food or water; no sharing personal items (i.e. water bottles, sweat towels, deodorant etc.)
- Enhanced cleaning of equipment before, during, and after training activities
- Avoid touching face and head, except to cover your mouth when coughing then wash hands immediately after
- Everyone must wash hands with soap and warm water for at least 20 seconds upon arrival
- Everyone must comply with the self-screening evaluation before participating <u>https://docs.google.com/forms/d/e/1FAIpQLSduVLLELTX_YtzPgNdpa2WAq5Q3viGK5o09ZT_fiH5uAfHIFw/viewform</u>
