

School community members who must travel out-of-state are subject to State guidelines and orders. According to State of Hawai'i travel requirements, all out-of-state travelers are subject to a 10-day home quarantine unless granted an exemption through vaccination, the State Office of COVID Exemption or cleared through a State-approved pre-travel COVID test.

**Vaccinated** students may return to campus provided:

1. Student registers planned travel through designated division principal/designee and notifies school nurse.
2. Student submits a negative test result of an approved antigen/PCR test taken 3-5 days after returning to O'ahu. The student must remain at home until the test result is received.

**Unvaccinated** students may return to campus provided:

1. Student registers planned travel through designated division principal/designee and notifies school nurse.
2. Student takes an approved, pre-travel PCR test and registers through the State's Safe Travels App.
3. Student submits a negative test result of an approved antigen/PCR test taken 3-5 days after returning to O'ahu. After receiving a negative COVID test OR following a 10-day home quarantine, the student may return to campus.
4. If a student has a positive antigen test, then they would follow-up with a PCR test to verify the result, and, if positive, would follow COVID illness procedure.

**Faculty and Staff** must remain at home until they submit negative results of an approved antigen/PCR test taken 3-5 days after returning to O'ahu--even if fully vaccinated--and with clearance from the Nurse. This requirement is due to the emergence of variants that appear to have a propensity to "breakthrough" the vaccine. Test results should be provided to the nurse at [school.nurse@lejardinacademy.org](mailto:school.nurse@lejardinacademy.org).
